RENOLOG[®]

Alpha Keto Amino Acid Tablets

Alpha Keto Amino Acids (AKAA) Tablet with a Comprehensive Indian Study on 132 Patients.

Description:

RENOLOG[®] is a combination of alpha keto amino acids and essential amino acids. It is used for the treatment of chronic kidney disease patients on conservative management therapy (CKD stage I, II, III). In combination with very low protein diet / low protein diet, it helps in delaying the progression of kidney disease during the predialysis period, by reducing the nitrogenous wastes.

Indication:

Prevention and therapy of damages due to faulty/deficient protein metabolism in chronic renal insufficiency.

Helps to delay the progression of CKD by:

- Reducing the nitrogenous wastes in blood.
- Preventing the degradation of body proteins.
- Reducing urinary protein excretion.
- Decreasing Secondary Hyperparathyroidism and Renal Osteodystrophy.
- Normalizing carbohydrate metabolism.
- Improving the disturbed serum lipid profile.
- Increasing the intervals between two dialysis.
