Inhipraz

Pantoprazole Gastro resistant 40mg Tablets

Inhipraz-D

Pantoprazole Gastro- resistant 40 mg and  
Domperidone Prolonged-release 30 mg Capsules

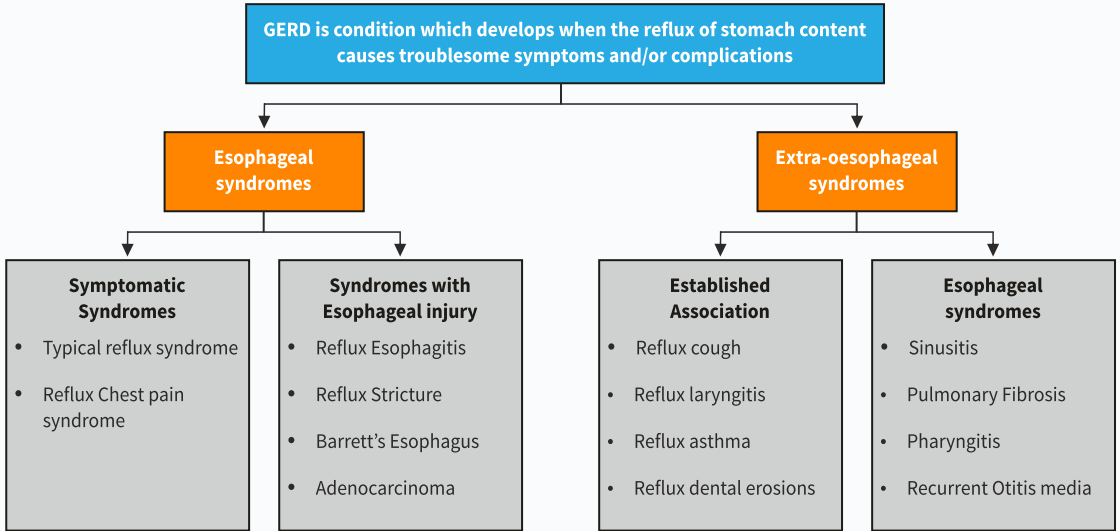

# Inhipraz

Pantoprazole Gastro resistant 40mg Tablets

# Inhipraz-D

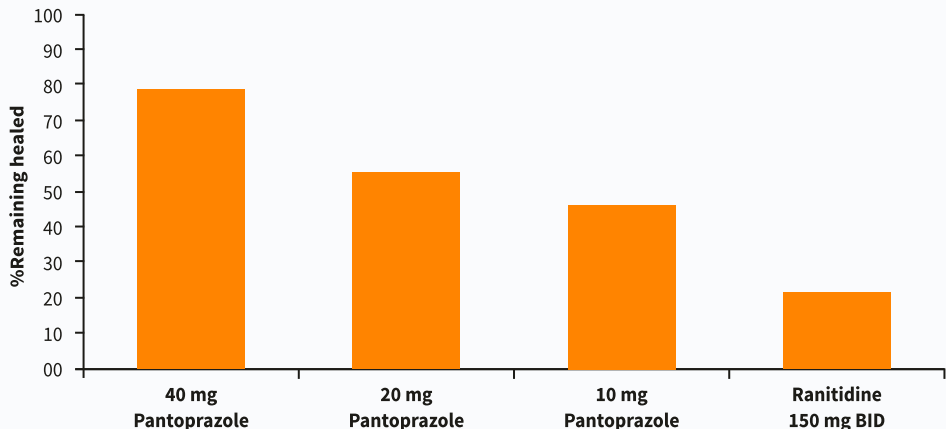

Pantoprazole Gastro- resistant 40 mg and Domperidone Prolonged-release 30 mg Capsules

## FACTORS ASSOCIATED WITH GERD: <sup>1</sup>

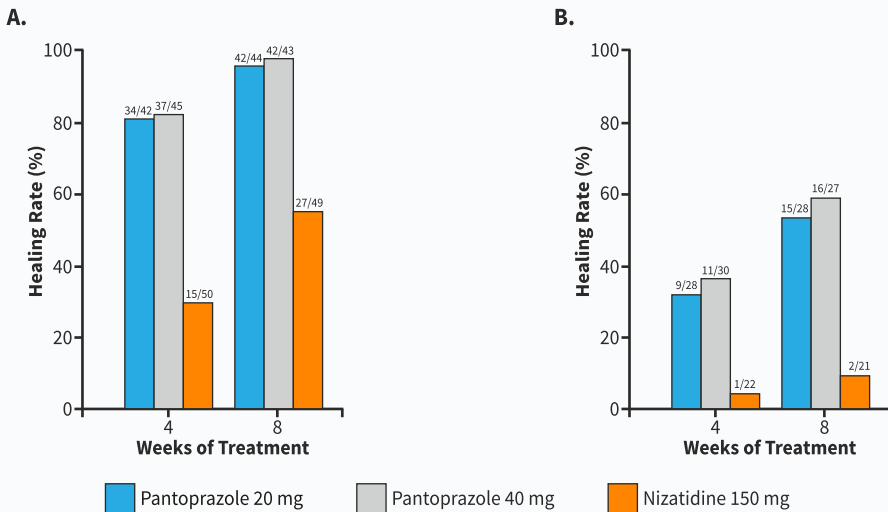

## PANTOPRAZOLE IN INHIPRAZ OFFERS: <sup>2</sup>

- Pantoprazole, the most stable PPI at moderately high pHs (greater than 3.0), binds only to cysteine residues that play a crucial role in inhibiting Gastric Acid.
- Pantoprazole 40-mg is the most effective regimen and consistent in maintaining Erosive Esophagitis healing with a good safety and tolerability profile.

- Maintenance oral pantoprazole therapy up to 3 years at dosages of 40–120 mg b.d. was effective and well tolerated in patients with Zollinger-Ellison syndrome.
- Pantoprazole, at single daily dose 40 mg for up to 8 weeks, provides more rapid relief of symptoms and superior healing of erosive esophagitis than Nizatidine 150 mg b.d.

- Oral pantoprazole has been shown to improve the quality of life of patients with GERD and is associated with high levels of patient satisfaction with therapy.

## CLINICAL EVIDENCE: <sup>1</sup>

Randomized clinical trials comparing the efficacy of maintenance therapy with pantoprazole versus other acid suppressing agents in patients with healed erosive esophagitis	
Reference	Inference
Lauritsen et al 2000 (double-blind, 12-month trial)	Pantoprazole 40 mg once daily is superior than Omeprazole in preventing recurrence of Reflux Esophagitis.
Metz et al 2003 (double-blind, 12-month trial)	Pantoprazole 40 mg once daily was superior to ranitidine (150 mg twice daily) in maintaining erosive oesophagitis healing.

## DOMPERIDONE IN INHIPRAZ-D <sup>5,6.</sup>

- Domperidone acts as both an antiemetic and an upper gastrointestinal tract pro kinetic agent.
- Dopamine plays an important physiologic role in the regulation of gastric emptying by producing gastric relaxation and inhibiting gastric motility.
- Domperidone has been shown to reduce GI symptoms and Hospitalizations from Gastroparesis & enhances quality of life.

# Inhipraz

Pantoprazole Gastro resistant 40mg Tablets

# Inhipraz-D

Pantoprazole Gastro- resistant 40 mg and  
Domperidone Prolonged-release 30 mg Capsules

## INDICATIONS:

- GERD
- Erosive Esophagitis
- Zollinger-Ellison Syndrome
- Gastritis

## KEY FEATURES:

### 1. Pantoprazole :

- a) Potent PPI agent
- b) Superior Anti Seceratory activity than Omeprazole
- c) Longer duration of action than Omeprazole & Lansoprazole

### 2. Domperidone :

- a) Dopamin D2 receptor antagonist
- b) Increases Gastric Motility & Peristalsis
- c) Facilitates Gastric Emptying

## DOSAGE:

As Prescribed by healthcare professional.

## STORAGE:

Store at a temperature not exceeding 30°C.

Keep at a cool and dry place.
