TheBune

A Boon for Morning Sickness

Description

A unique bilayered Tablet containing Ginger Rhizome Powder - 500 mg with Sustained Release as well as Immediate release profiles and Vitamin B₆ (Pyridoxine) - 10 mg as Immediate Release.

Indication

It has been specially formulated for pregnant women to help relieve the symptoms of morning sickness such as nausea and vomiting.

Mechanism Of Action

Natural ginger from THEBUNE reduces the frequency and severity of morning sickness and relieve symptoms such as nausea and vomiting by acting peripherally, within the gastrointestinal tract, by increasing the gastric tone and motility due to anticholinergic and antiserotonergic actions. It is also reported to increase gastric emptying.

Pyridoxine from THEBUNE serves as a co factor in GABA synthesis and GABA acting as the inhibitory neurotransmitter at chemoreceptor trigger zone (CTZ), which suppresses vomiting.

Dosage

THEBUNE should be preferably taken on an empty stomach twice in a day or as suggested by a Health care Professional.
