

Torvigress

Torsemide 10 mg, 20 mg, 40 mg & 100 mg Tablets

Torvigress **Plus**

Torsemide 10 mg and Spironolactone 50 mg Tablets

Torvigress

Torsemide 10 mg, 20 mg, 40 mg & 100 mg Tablets

Torvigress Plus

Torsemide 10 mg and Spironolactone 50 mg Tablets

DESCRIPTION:

- » **Torvigress** contains Torsemide, which is a high-ceiling loop diuretic which acts on the thick ascending limb of the loop of Henle to promote rapid and marked excretion of water, sodium and chloride.
- » **Torvigress Plus** is a fixed-dose combination of torsemide which is a loop diuretic of the pyridine-sulfonylurea class and spironolactone which is a specific pharmacologic antagonist of aldosterone.

INDICATION:

- » For the treatment of hypertension, to lower blood pressure
- » For the treatment of edema associated with heart failure and renal disease

MECHANISM OF ACTION:

» Spironolactone -

Spironolactone is a specific pharmacologic antagonist of aldosterone, acting primarily through competitive binding of receptors at the aldosterone-dependent sodium-potassium exchange site in the distal convoluted renal tubule. Spironolactone causes increased amounts of sodium and water to be excreted, while potassium is retained. Spironolactone acts both as a diuretic and as an antihypertensive drug by this mechanism.

» Torsemide -

Torsemide causes excretion of sodium, chloride and water by inhibiting sodium and chloride reabsorption in the ascending loop of Henle and distal collecting tubule. The effect is caused by blocking the chloride-binding site of the $\text{Na}^+/\text{K}^+/\text{2Cl}^-$ cotransport mechanism.

DOSAGE:

Torvigress -10, 20, 40, 100 :

For Hypertension :

The recommended initial dose is 5 mg once daily. If the 5 mg dose does not provide adequate reduction in blood pressure within 4 to 6 weeks, increase to 10 mg once daily, or as prescribed by the doctor.

Edema associated with :

Heart failure: Initial dose is 10 or 20 mg once daily. Titrate by factors of two; doses above 200 mg have not been studied.

Chronic Renal Failure: Initial dose is 20 mg once daily. Titrate by factors of two; doses above 200 mg have not been studied.

Torvigress Plus 10 :

The recommended dose of **Torvigress Plus 10** is once daily or as prescribed by the doctor.
