Nortriptyline 10 mg Tablets

PBREN-D

Pregabalin & Duloxetine 50 mg + 20 mg, 75 mg + 20 mg
& 75 mg +30 mg Capsules

DESCRIPTION:

PBREN-D contains pregabalin in combination with duloxetine in the strengths of 50 mg + 20 mg, 75 mg + 20 mg and 75 mg + 30 mg capsules.

MECHANISM OF ACTION:

- ⊙ **Pregabalin** is a calcium channel antagonist which shows specific binding affinity for the $\alpha 2\text{-}\delta$ auxiliary sub-units of voltage-dependent calcium channels which results in decreased Ca^{2+} influx thus shows antinociceptive effects.¹
- ⊙ **Duloxetine** is a potent balanced inhibitor of the neuronal reuptake of serotonin and nor-epinephrine. As Serotonin and nor-epinephrine has a role in inhibiting the pain perception, it increases the level of both which reduces the pain perception.²

INDICATION:

- ⊙ Fibromyalgia
- ⊙ Peripheral Neuropathic Pain

DOSAGE AND ADMINISTRATION:

As directed by Registered Medical Practitioner.

KEY FEATURES:

- ⊙ In fibromyalgia, combined therapy of pregabalin and duloxetine is more effective in comparison to mono-therapy.³
- ⊙ Pregabalin with Duloxetine safely improve outcomes in fibromyalgia, including pain relief, physical function, and overall quality of life.³
- ⊙ Pregabalin and Duloxetine in combination have a clinically additive effect in the treatment of painful diabetic neuropathy, resulting in an enhanced pain relief compared to the use of either drug alone.⁴

PRESENTATION:

Available as strip of 10 capsules.
