Pregabalin 75 mg Sustained Release Tablets

**Description:**

PBREN consists of Pregabalin available in the strength of 50 mg, 75 mg, 150 mg capsules and PBREN-SR is available in 75 mg sustained release tablets.

**Indication:**

PBREN / PBREN-SR is indicated for :

- Neuropathic pain associated with diabetic peripheral neuropathy
- Postherpetic neuralgia
- Fibromyalgia
- Neuropathic pain associated with spinal cord injury
- Adjunctive therapy for adult patients with partial onset seizures

**Mechanism of Action :**

Pregabalin binds to the alpha 2 delta receptor of an auxiliary sub-unit associated with voltage gated calcium channel in central nervous system tissues and thereby inhibits influx of calcium and release of glutamate, norepinephrine, substance-P and other neurotransmitters.

**Dosage:**

As directed by the physician.

**Presentation:**

PBREN available as a strip of 10 capsules.

PBREN-SR available as a strip of 10 tablets.

**Storage:**

Store protected from light and moisture at a temperature not exceeding 30°C.
